Combi Child Car Seat Joytrip Advance Kids

User Manual

- For the safety of the child, please read this user manual carefully before use and use the child car seat properly.
- Store this user manual in the storage pocket of the base cover.

This product is an i-Size booster seat, and is certified according to the UN R129/03 standard.

- This product can be installed to vehicle seats approved for installation of ISOFIX child car seats. However, this does not mean that this child car seat can be installed to any vehicle seat equipped with ISOFIX anchors (bars). When using the child car seat, always check the vehicle compliance and check the user manual of the vehicle to see if it is compatible with ISOFIX size class.
- This mode is only suitable for vehicles equipped with 3-point seatbelts approved under UN R16 standard or other equivalent standards.

Applicable child height

Before Use

Thank you for purchasing this Combi child car seat.

For the safety of the child, please read this user manual carefully before use and use the child car seat properly.

< About using second-hand child car seats >

- Never use a child car seat with an unclear usage history, especially one with an unclear accident history.
- Never use a child car seat if it has cracks, large scratches or loose fasteners. A strong impact may have been applied to the child car seat due to a collision or dropping it.

The child car seat is designed to reduce injury to child in case of traffic accident, etc. However, there is no guarantee that the child car seat can completely protect the child from injury. A child using the child car seat must be accompanied by an adult.

●Labels

The descriptions in this manual use the labels DANGER, WARNING and CAUTION to indicate important items for safe and proper use of the child car seat. These are very important items that indicate potential consequences if not followed properly, and are categorized according to the level of severity. Always make sure to follow these items.

Label	Label contents
 DANGER	Improper handling will result in imminent risk of death or serious injury.
 WARNING	Improper handling may result in death or serious injury.
 CAUTION	Improper handling may result in injury or damage to property.
 HINT	Useful hints for using the child car seat.

Use conditions

The child car seat is used in the following modes according to the weight of the child.

Before Use

Use status		
Conditions	Height of 100 cm to 150 cm	
How to restrain the child	Fasten the child directly with a car seat belt.	
How to fasten the child car seat in the vehicle	A	B
	Fasten the child car seat in the vehicle seat with the ISOFIX connector and a vehicle seatbelt that restrains the child.	Fasten the child car seat in the vehicle seat with a vehicle seatbelt that restrains the child

DANGER

Do not use the child car seat if the child does not meet the following conditions.
Applicable child height: Height of 100 cm to 150 cm.

Applicable Vehicle Seats

This child car seat can be installed to vehicle seats approved for installation of ISOFIX child car seats.

However, this does not mean that the child car seat can be installed in any vehicle equipped with ISOFIX anchors (bars).

When using the child car seat, always check the vehicle compliance and check the user manual of the vehicle to make sure the ISOFIX size classes noted below are supported.

ISOFIX size classes of this product

Height of the child	Anchors
100 cm to 150 cm	B2

Before Use

ISOFIX anchoring system

ISOFIX anchors are metal fixtures (bars) provided between the vehicle backrest and seat in order to install an ISOFIX child car seat. Depending on the type of vehicle, the name or location may vary depending on the type of vehicle, so check your vehicle's owner's manual.

Types of Vehicle Seatbelts and Precautions for Use

Depending on the type of seatbelt, the child car seat may not be able to be installed or may be installed differently.

This mode is only suitable for vehicles equipped with a 3-point seatbelt approved under UN R16 standard or other equivalent standards.

DANGER

- Be sure to install the child car seat on a vehicle seat with a 3-point seatbelt.
- Never install the child car seat on a vehicle seat with a 2-point seatbelt. Installing the child car seat on such a vehicle seat may prevent the child car seat from functioning properly, which is dangerous to the child.

Before Use

2-point seatbelt

As shown in the figure, a seatbelt that does not have a shoulder belt and supports the body at two points on the right and left of the waist belt.

3-point seatbelt

As shown in the figure, a seatbelt that supports the body at three points: the right and left sides of the waist belt and the shoulder belt.

Types and characteristics of seatbelts (differentiation)		Precautions for installation
ELR	Pull the seatbelt slowly to move it in and out freely, and pull it vigorously to lock it.	Slowly pull out the seatbelt and attach the child car seat.
AELR	If you pull out all the seatbelt and then let it rewind, the child car seat securing function will work and you will not be able to stretch the seatbelt anymore. (It will be released when the entire seatbelt is rewound.)	It is dangerous to completely pull out the seatbelt. Return the seatbelt once to cancel the child car seat securing before attaching the child car seat.
Other	Seatbelts that do not apply to the above	The other seatbelts cannot be used.

7

※ If you are unsure of the type of seat belt, please contact your automobile manufacturer.

Inapplicable Vehicle Seats

Continue ➞

Do not use the child car seat if it cannot be secured firmly, even if none of the conditions noted below apply.

※ We do not recommend mounting car seats on the front passenger seat regardless of if there are airbags or not; thus we have not conducted a vehicle model compatibility survey on the front passenger seat.

- **Vehicle seat equipped with a front airbag.**
....Installation is possible to a vehicle seat with only a side airbag.

- **Vehicle seat facing backwards or sideways relative to driving direction.**

- **Extreme bucket seat**
....Vehicle seat that goes deep in the center of the seatbase.

- **Vehicle seat with a seat on an extremely uneven surface that prevents stable installation.**

- **Vehicle seat with extremely protruding vehicle headrest**
....Due to the shape of the vehicle headrest, it is not possible to recline the back of the seat or adjust the headrest of the child car seat.

※ If the headrest of the vehicle seat can be removed, which enables reclining or adjusting the headrest, the child car seat can be attached to such a seat.

Before Use

Inapplicable Vehicle Seats

Before Use

- Vehicle seat that is not equipped with a vehicle seatbelt.

- Vehicle seat with a passive seatbelt.

※ Passive seatbelt
....A device that automatically attaches the vehicle seatbelt when you sit in a vehicle seat and close the door.
(Automatic seat belt)

- Vehicle seat with a 2-point seatbelt.

- Vehicle seat with a vehicle seatbelt coming from the middle of the seat.
....Vehicle seat where the seatbelt comes from a position before the waist belt guide of the child car seat.

- Vehicle seat with an extremely short vehicle seatbelt.

For Safe Use of the Child Car Seat

Continue

DANGER

Improper handling will result in imminent risk of death or serious injury.

- Do not seat a child who does not satisfy the use conditions, or install the child car seat to an inapplicable vehicle seat.

- Do not allow the child to stand, crouch or kneel on the child car seat.

- Do not install the child car seat to a vehicle seat equipped with a front airbag. In case of collision, the deploying airbag will strongly impact the child seat, which is dangerous to the child. ...Installation is possible to a vehicle seat with only a side airbag.

Before Use

For Safe Use of the Child Car Seat

- Do not install the child car seat by a method other than described in this user manual and indicated on the main body.

- When you sit your child in the junior seat mode, make sure that the vehicle seatbelt insert tongue is properly inserted into the vehicle buckle and will not come out.

Before Use

Evacuation in case of emergency

In case of emergency, parents should immediately unbuckle the seat belt of the vehicle so that children can escape from the vehicle in time.

⚠ WARNING

Improper handling may result in death or serious injury.

- The child car seat may suffer structural damage in the event of collision or even if it is dropped one time or falls from a high level. In this case, immediately stop using the child car seat even if no damage is visible.
- Do not leave the child alone in the vehicle. On days with strong sunlight, the temperature inside the vehicle may become high and the child may become dehydrated. It may also cause unexpected accidents. A child using the child car seat must be accompanied by an adult.

Before Use

- Do not modify or improperly repair the child car seat.

- If a two- or three-door vehicle has a person in the back seat, do not attach the child car seat to the front passenger seat. It will prevent the child from escaping in an emergency.

- Keep the child chair fastened with the connector and top tether hook or the vehicle seat belt even when the child is not sitting. Otherwise, the child car seat may roll inside the vehicle, interfering with driving in case of sudden braking.

For Safe Use of the Child Car Seat

- Do not install the child car seat in a seat with **the vehicle seatbelt damaged** in any way.

- When using a vehicle seatbelt with a child seat fastening function, **do not enable fastening**. The belt will be too tight around the child and their chest will be compressed.

Before Use

⚠ CAUTION

Improper handling may result in injury or damage to property.

Before Use

- Make sure the child car seat does not get jammed between the vehicle doors or other movable parts.

- Do not use the child car seat with the seat cover and other sewn parts or the urethane and other cushioning removed. Also do not replace these parts with parts not specifically authorized by Combi for this product. (This may negatively affect safety performance in the event of collision.)

- Exposing the child car seat to direct sunlight may cause the main body, insert tongue and other parts to become hot and burn the child. Touch each part and check that it is not too hot before seating the child.

- Be careful not to get your fingers caught in the gap between the seat and backrest.

- Depending on the shape and surface material (leather, etc.) of the vehicle seat, scratches or marks may remain on the vehicle seat after installation.

- Do not install, remove or carry the child car seat with a child on it.

For Safe Use of the Child Car Seat

- If you have any unfastened objects in the vehicle, be careful as they may hit the child in the event of any sudden braking or a collision.

- Do not install a child car seat on a vehicle seat with cushions on it. The child seat will not be firmly fastened.

Before Use

- If you use the child car seat as a normal chair, the child sitting may fall off and be injured. Only use the child car seat as described in this user manual.

- Do not operate or adjust the child car seat while driving. Also, make sure that other children on board do not touch the child car seat.
- Do not expose the child car seat to wind or rain.
- Users should be especially careful when fastening or adjusting the child car seat to prevent fingernails becoming jammed in gaps or moving parts.

Daily inspection

To ensure proper function of the child car seat, check the following items before use:

※When installed using the fixed method A of the vehicle on page 5 or page 22

Check that the connector adjustment lever color indicators show the locked condition ('red' is not visible).

Check that the connectors are fastened securely to the ISOFIX anchors of the vehicle.

Check that the connector release button color indicators show the locked condition ('green' is visible).

Try to rock the base in all directions to make sure that the child car seat is securely fastened to the vehicle seat.

Before Use

Assembly Method

The seat and backrest come unassembled in the sales package.

Before Use

CAUTION

- To prevent damage to the product and floor, assemble the child car seat on a flat floor with something soft between the child car seat and the floor.
 - When assembling the product, be careful of people around you and be careful not to get your fingers caught.
 - When carrying the assembled child car seat, hold it as shown in the figure and be careful not to get your fingers caught in the joint between the backrest and the seat base.
- ※ The backrest and seat base of the assembled child car seat will move.

Junction between the backrest and seat base

Installing the backrest

- 1 Place the backrest and seat base on a flat floor with something soft between the floor and the backrest and seat base.

- 2**
- ① Align the backrest hook with the seat base joint.
 - ② With the backrest hooks aligned with the seat base joints, slowly raise the backrest until it touches the seat base.
- ※ When raising, go over the two protrusions.
(Refer to Backrest usage range.)

Before Use

**WARNING**

Please be sure to install the backrest

Backrest usage range

- ① When you raise the backrest from the horizontal position, you will go over the first protrusion.
- ② When you raise it further, you can go over the second protrusion and make the backrest self-supporting. Use the backrest in the range between the points where you go over the first and second protrusions.

※ The removal is the reverse procedure from installing the backrest.

Assembly Method

Attaching the seat cover installing rubber ring

Lift up the headrest cover, then lift up the backrest cover and attach the left and right 2 seat cover fixing straps to the seat cover fixing hooks. (The hook can be seen when you open the backrest cover.)

Before Use

※ The seat cloth cover is fixed hook, open the backrest cover as shown in Figure ②. (Picture ② is on the left side when viewed from the front)

Preparation of Installation

Continue

DANGER

- Do not install the child car seat by a method other than described in this user manual and indicated on the main body.
- Do not install the child car seat to a vehicle seat equipped with a front airbag. In case of collision, the deploying airbag will strongly impact the child car seat, which is dangerous to the child.

WARNING

- Do not install the child car seat in a seat whose vehicle seatbelt is damaged in any way.

- 1** ① Park the vehicle in a flat location where all doors can be opened.

- ② Slide the front seat forward and tilt the backrest to the front to create space for easier installation to the vehicle.

How to use

Preparation of Installation

- 2** ① Remove the vehicle headrest if possible.
✕ Store the removed vehicle headrest in the trunk or cargo compartment.
② Recline the vehicle seat backrest slightly if possible.

How to use

HINT

If the vehicle headrest cannot be removed, raise it to the top position.

- 3** Fit the ISOFIX insertion guides onto the ISOFIX anchors.

ISOFIX insertion guide

ISOFIX anchor

HINT

Use the supplied ISOFIX insertion guides for easier child car seat installation when ISOFIX anchors are hidden by the vehicle seat and difficult to see. However, note that attaching the ISOFIX connectors may increase the gap between the back of the base and seat backrest for some vehicle seats. In these cases, install the child car seat without using the ISOFIX connectors.

Installing to the Vehicle

Continue

Can be install the in the following two ways.

Height of 100 cm to 150 cm		
How to restrain the child.	Restrain the child directly with the vehicle seatbelt	
	A	B
How to fasten the child carseat in the vehicle.	Install the child car seat in the vehicle seat with the ISOFIX connector and vehicle seatbelt.	Use the vehicle seatbelt that restrains the child to fasten the child car seat in the vehicle seat.

How to install in A

- 1 ① While pulling the side connector adjustment lever.
 - ② pull out the ISOFIX connector as far as possible.
 - ③ Release the connector adjustment lever and check that the indicator A shows the locked condition ('red' is not visible).
- ※ Perform the above operation on the right and left sides.

How to use

Installing to the Vehicle

2 Attach the ISOFIX anchors to the connectors.

- ① Fit the ISOFIX connectors onto the right and left ISOFIX anchors of the vehicle seat and push the ISOFIX connectors until they lock with a 'click' sound.
- ② Check that the right and left color indicators B show the locked condition ('green' is visible).

How to use

3 Push the child car seat base until the back of the child car seat touches the vehicle seat backrest.

- ① Fit the ISOFIX connectors onto the right and left ISOFIX anchors of the vehicle seat and push the ISOFIX connectors until they lock with a 'click' sound.
- ② Check that the right and left color indicators B show the locked condition ('green' is visible).

How to use

HINT

- When pushing the child car seat, adjust the position while checking the length of the ISOFIX connector so that the difference between the right and left remains small.
- In some vehicles there may be a gap between the vehicle seat backrest even when the back of the child car seat is pushed firmly.

Installing to the Vehicle

- 4** Adjust the installing position so that there is no gap between the child car seat and the vehicle seat backrest.

If the vehicle seat backrest cannot be reclined, adjust the reclining angle of the child car seat to make the gap between the back of the base and vehicle seat as small as possible.

How to use

Backrest usage range

- ① When you raise the backrest from the horizontal position, you will go over the first protrusion.
- ② When you raise it further, you can go over the second protrusion and make the backrest self-supporting. Use the backrest in the range between the points where you go over the first and the second protrusions.

WARNING

- If the backrest of the vehicle seat can be reclined, adjust the reclining angle of the vehicle seat so that the backrest of the child car seat is set to the angle shown in the Backrest usage range. If the backrest tilts further than the Backrest usage range, the child car seat will not function properly in case of a collision, which is dangerous to the child.
- If the child car seat is used with an extremely large gap between the child car seat and the vehicle seat, the child car seat will not function properly in an accident, which is dangerous to the child.

5 Fasten the child car seat with the vehicle seatbelt.

- ① Pull out the vehicle seatbelt.
- ② Pass the vehicle seatbelt through the shoulder area belt guide.
- ③ Pass the vehicle seatbelt through the right and left waist belt guides.
- ④ Pass the vehicle seatbelt through the shoulder area belt guide and then through the waist belt guides on the side near the vehicle buckle.
- ⑤ Insert the insert tongue into the vehicle buckle until they lock with a 'click' sound.

※ If the ISOFIX cover interferes with installation, remove it from the ISOFIX bracket.

⚠ CAUTION

Fasten the child car seat even when the child is not sitting, as it may hit the driver or passengers when suddenly braking or in a collision.

How to use

Installing to the Vehicle

DANGER

If using the ISOFIX connector interferes with installing the vehicle seatbelt or vehicle buckle, do not use the ISOFIX connector; install the vehicle seat only with the vehicle seatbelt.

WARNING

If the vehicle buckle or insert tongue hits the child car seat body and the vehicle seatbelt becomes loose, the installation becomes unstable. Do not use the child car seat unless it is stable. If you have any questions, please contact Combi's Customer Service Center.

How to install in B

1 Store the ISOFIX connector.

- ① While pulling the side connector adjustment lever.
 - ② pull out the ISOFIX connector as far as possible.
 - ③ Release the connector adjustment lever and check that the indicator A shows the locked condition ('red' is not visible).
- ※ Perform the above operation on the right and left sides.

How to use

2 Fasten the child car seat with the vehicle seatbelt.

(Refer to Step 5 Fasten the child car seat with the vehicle seatbelt on page 26.)

- ※ If the ISOFIX insertion guides disturb the installation, remove the ISOFIX insertion guides from the ISOFIX anchors.

Checklist after Installation

After the child is seated and the vehicle seatbelt is fastened, check the following to make sure that the child car seat is installed properly.

Check ① to ⑨ for fastening method A.

Check ① to ⑥ for fastening method B.

- ① Check that there is no large gap between the backrest of the vehicle seat and the child car seat.
- ② Check that the vehicle seatbelt has passed through the shoulder area belt guide, does not compress the child's neck and is not off the shoulder of the child.
- ③ Check that the vehicle seatbelt fits the child and is not twisted or loose.
- ④ Check that the vehicle seatbelt is around the child's pelvis position.
- ⑤ Check that the insert tongue of the vehicle seatbelt is securely inserted into the vehicle buckle and cannot be disconnected.
- ⑥ Check that the vehicle seatbelt passes through the right and left waist belt guides.
- ⑦ Check that the connector release button indicator B shows 'green'.
- ⑧ Check that the indicator A red part of the connector adjustment lever is not visible.
- ⑨ Check that the right and left sides of the child car seat main body and the vehicle seat are parallel. (The ISOFIX connector is not pushed further on only one side.)

HINT

- **If the armrests of the vehicle seat may hide the indicator and making it difficult to check visually :** Insert the ISOFIX connectors into the ISOFIX anchors and confirm that the right and left connectors lock with a 'click' sound. After that, make sure that the ①, ⑨ in Checklist after installation are properly performed.
- **If the shape of the seat base may make it impossible to operate the connector adjustment lever :** Adjust the length of the ISOFIX connector so that it touches the backrest of the vehicle and insert the ISOFIX connectors into the ISOFIX anchors to lock them. Then, confirm that the right and left ISOFIX connectors lock with a 'click' sound. After that, make sure that the ①, ⑨ in Checklist after Installation are properly performed.

How to use

Uninstalling from the Vehicle

- ① Press the right and left connector release buttons with your middle and ring fingers to remove the ISOFIX connector from the ISOFIX anchors.
- ② Check that the indicator B shows the unlocked condition ('green' is not visible)

When the ISOFIX connector is hard to release:

When the ISOFIX connector is installed properly, the repulsion force of the vehicle seat may make it difficult to release the ISOFIX connector. If it is difficult to release, use the following method to reduce the repulsion force from the vehicle seat, one side at a time, to release it.

- ① While pushing the seat base into the vehicle backrest, operate the connector adjustment lever to extend the ISOFIX connector.
- ② Push the connector release button.

Adjustment of head guard position

Change the baby shoulder belt and head guard positions according to the child's growth.

The baby shoulder belt and head guard positions can be adjusted in 11 levels.

- ① While pulling the head guard adjustment lever, adjust the height of the head guard.
- ② Release the head guard adjustment lever in the proper position.
- ③ Move the head guard vertically to check that it is fastened.

HINT

When making adjustments, be sure to pull up on the headrest adjustment lever.

How to use

CAUTION

When adjusting the baby shoulder belt position, keep the child's hands and fingers away. Also, pay attention to other passenger's hands. Otherwise, their hands or fingers may get caught and they may be injured.

Seating the Child

- 1 Remove the insert tongue from the vehicle buckle once, have your child sit deep in the child car seat and adjust the height of the head guard to suit your child. (Refer to Step 2 of Adjustment of head guard position on page 32.)

How to use

Head guard (Shoulder area belt guide) height reference

Adjust the head guard height so that the shoulder area belt guide is slightly above the child's shoulder.

⚠ WARNING

The shoulder area belt guide adjusts the vehicle seatbelt (shoulder area) so that it is fastened in the correct shoulder position for the child. As the child grows and the shoulder area belt guide is lowered, readjust the height of the head guard.

- 2**
- ① Pull the vehicle seatbelt forward.
 - ② Pass the vehicle seat belt through the shoulder area belt guide.
 - ③ Pass the vehicle seatbelt through the right and left waist belt guides.
 - ④ Pass the vehicle seatbelt that was passed through the shoulder area belt guide through the waist belt at the vehicle buckle side.
 - ⑤ Insert the insert tongue into the vehicle buckle until they lock with a 'click' sound.

**WARNING**

- Check that the baby belt is not twisted or loose.
- Always pull down the baby waist belt to firmly hold the pelvis position.

How to use

- 3** If the vehicle seatbelt is loose, pull the vehicle seatbelt (shoulder area) upward to adjust the tension.

Seating the Child

WARNING

- This product becomes unstable if it is fastened with the vehicle seatbelt. If the child gets on and off by themselves without the assistance of an adult, they may slide off the vehicle seat or fall down. Be sure to have an adult take them down.
- Sitting the child as shown below may cause the child car seat to function improperly, which is dangerous to the child.

- Make sure that the child's arm comes over the vehicle seatbelt.

- The child squeezes or leans forward.

- The child is sitting with their body leaning to the left or right.

- The child crouches, sits straight or kneels on the seat.

How to Use Car Seatbelt Cover

An attached car seatbelt cover may be used so that the vehicle seatbelt does not come into direct contact with the child. If you do not use a seat belt cover, you can also use the vehicle seat belt directly to secure the child in the vehicle seat as shown in the illustration on page 34.

- ① Attach the loop at the top of the car seat belt cover to the shoulder belt guide.
- ② Wrap the car seat belt cover around the vehicle seat belt and fasten it with the snap buttons at the upper and lower positions. Place the flap of the seat belt cover on the vehicle seat belt as shown in the figure below.
- ③ Secure the child to the vehicle seat with the child restraint as shown in "Seating the Child" on page 33.

Attaching and Removing the Covers

Attaching and removing the head guard cover

- ① Pull up the head guard to the top level. (Refer to Adjustment of head guard position on page 32.)
- ② Remove the head guard installing rubber rings (one each for the right and left sides) from the back of the head guard.
- ③ Remove the head guard cover installing hooks (one each for the right and left sides) from the back of the head guard.
※ A triangle arrow is placed as a mark.
- ④ Remove the hooks (two places from the rear upper section of the head guard cover).
- ⑤ Remove the head guard cover from above.

※ Installation is the reverse procedure from removal.

Attaching and Removing the backrest cover

- ① Remove the hooks (one for the left side and one for the right side) from the bottom of the backrest cover.
- ② Remove the two hooks from the top of the backrest cover.
- ③ Remove the sides of the backrest cover from the backrest side groove of the childcar seat body.

※ Installation is the reverse procedure from removal.

CAUTION

When using, be sure all the parts at the end, to install the backrest cover and tuck it into the in the groove of the child car seat side.

HINT

To install the backrest cover, insert the cover into the groove of the child car seat side from the bottom and adjust all the parts at the end.

Attaching and Removing the Covers

Removing the backrest and seat

- ① Store the ISOFIX connector. (Refer to How to install in B on page 28.)
- ② Lower the head guard to the bottom. (Refer to Step 1 of Adjustment of head guard position on page 32.)
- ③ Tilt the backrest until it is even with the seat base.
- ④ Hold up the backrest to remove the hooks from the joints on the seat base.

Attaching and Removing the Covers

- ① Remove the backrest and seat. (See the procedure under "Removing the backrest and seat" on page 39.)
- ② Remove the seat cover installing rubber ring.
- ③ Remove the two hooks from the front of the seat cover.
- ④ Remove the hooks (one for the right side and one for the left side) from the side of the seat cover.
- ⑤ Remove the hooks (one for the right side and one for the left side) from the rear of the armrests.
- ⑥ Pull out the armrest section and remove the seat cover

※ Installation is the reverse procedure from removal.

Maintenance Method

Washing the seat cover and other sewn parts

Be sure to follow the washing instructions and cautions below.

- Follow the instructions noted on the washing label sewn onto the sheet cover.
- When using a washing machine, place the items in a laundry net. Failure to do so may result in fraying or other damage.
- Use the gentle cycle of the washing machine with cold or lukewarm water, or wash by hand. Do not use bleach.
- Use a neutral detergent. Do not use detergent containing fluorescent brightener or bleach. This may cause chapped skin or a rash.
- When using a horizontal washing machine (a washing machine with the drum facing horizontally or inclined), make sure the water level is sufficient.
- Color fading may occur due to the nature of the product.
- It is recommended to wash separately from other clothing and lightly colored items.
- Rinse thoroughly, wring out lightly, and then arrange the shape and dry in the shade.
- Do not use an iron.
- Do not use a dryer or dry cleaning.

Maintenance of the main body

Normally wipe clean with a well-wrung wet (water) cloth. When extremely dirty, remove the dirt using a solution or neutral detergent diluted with water, then wipe with a wet water (cloth) and dry in shade.

Urethane materials

- The dyestuff used in the seat cover and other sewn parts may transfer to the urethane materials on the back of these parts. However, this is not a problem for quality or safety.
- Urethane cushion materials for the seat base may not be washed.

WARNING

Do not use undiluted neutral detergent, gasoline, benzene or other organic solvents when cleaning. These may damage the main body and baby belt, which is dangerous to the child.

Storage and Disposal

Storage

Main body

When the child car seat will not be used for a long period of time, uninstall it and store in a well-ventilated place out of direct sunlight and away from children.

User Manual

Be sure to read and understand this user manual before use. Always keep this user manual in the storage pocket under the seat cover.

Disposal

- When disposing of this child seat, please follow the regulations in region.
- The child car seat may suffer structural damage in the event of collision or even if it is dropped one time or falls from a high level. In this case, immediately stop using the child car seat even if no damage is visible. When disposing of the child car seat after an accident, remove the seat cover and other parts before disposal to prevent the child car seat from being reused.

Standard service life

The Standard Service Life of this product is ten years after new purchase. Once this standard service life has passed, material aging may prevent the child car seat from functioning properly, which is dangerous to the child. To avoid unforeseen circumstances, refrain from use past the standard service life.

- Always make sure to store the receipt (proof of purchase) issued by the dealer and this user manual as a record of the new purchase date.
- Even within the standard service life, the product may malfunction due to use, environment and storage conditions, and quality is not guaranteed during this period.
- For reasons of overall product safety, repair of products past the standard service life cannot be accepted.
- Refrain from reusing products with an unknown usage history.
